

Aortic Aneurysm

What Is Aortic Aneurysm?

An aortic aneurysm refers to a dilated aorta at more than 1.5 times normal size. There are a number of causes of an aneurysm, but the condition ultimately results in underlying weakness in the aortic wall.

An aortic aneurysm can cause pain at times, which is a sign of potential rupture. When aneurysm rupture occurs, it will cause a massive internal hemorrhage. Unless this is treated immediately, shock and death will take place within minutes to hours.

What Causes Aortic Aneurysm?

An aortic aneurysm is caused by a weakness in the collagen and smooth muscle that support the artery in the abdomen. This weakness is triggered by inflammation, unnatural diet, and weak muscles in the diaphragm. Surgery for the condition is dangerous and must be avoided, except for emergencies.

Follow the Health Plan as recommended for the best results:

AORTIC ANEURYSM HEALTH PLAN

The following plan is designed to provide relief after an aortic aneurysm. For best results, combine the supplement plan below with a naturally healthy lifestyle.

*Your 4-8 Week Plan, From My eBook, by Robert Redfern
Supplements to support a healthy heart - in order of priority:*

- **[BlockBuster AllClear](#)** - Take 2 capsules x 3 times per day for 30 minutes before each meal, taking the last one before bedtime. Contains Serrapeptase, Nattokinase, Protease and Lipase. Blockbuster supports healthy arteries and a cardiovascular system, along with healthy blood pressure and circulatory system.
- **[Liposomal Vitamin C](#)** - Highly potent Vitamin C for maximum absorption, highly potent for cells. For best results, snip or tear the notched end off the packet, squeeze into one or more ounces of your favorite natural juice or water, drink on an empty stomach, and wait at least 15 minutes before eating.
- **[HealthyFlow](#)** - Take 2 teaspoons, 2 times a day in water or food. Contains L-arginine, L-lystine and L-citrulline that support healthy blood and arteries.
