

Pulmonary Tuberculosis

What Is Pulmonary Tuberculosis?

Pulmonary Tuberculosis is a contagious bacterial infection caused by TB, or *Mycobacterium tuberculosis*. Tuberculosis can easily spread from one person to another in the air. When a person has TB in their lungs or throat and laughs, coughs, sneezes, or talks, TB germs can spread into the air. If someone with a weak immune system inhales these germs, they could contract a tuberculosis infection.

What Causes Pulmonary Tuberculosis?

There is a difference between contracting a TB infection and having TB disease. A person with a healthy immune system that is infected with TB has TB bacteria living in their body. A healthy immune system will protect against these germs to prevent sickness.

If someone has TB disease and a weakened immune system, the disease can easily spread to other people. A person with tuberculosis needs to see a doctor as quickly as possible. Fortunately, it is fairly difficult to become infected with TB.

In most cases, you would have to spend a large amount of time with a person that has TB disease. TB may spread more easily between friends, family members, and co-workers. TB is spread in enclosed spaces over prolonged periods of time. In order for the disease to develop, tuberculosis bacteria must become pathogenic; a person under stress, eating a poor diet, or with a weakened immune system is more susceptible.

Healthy people can become infected with TB, but they are less likely to get sick. It should be your number one goal to become healthy.

Pulmonary Tuberculosis FAQ

Q: How can Serrapeptase help with tuberculosis?

A: Serrapeptase helps immensely as it clears out all of the inflammation, mucus, and dead scar tissue. By clearing away this problem tissue, it enables the body's own healing system to replace it with healthy tissue and better lung function as a result.

.....

Writer Jenny Pulling interviews Mrs. Dean:

“I am on the same treatment as those with TB,” she says,

“They are vicious drugs, and sometimes I think TB would be easier to cure. I asked the cardiologist if I could knock off these drugs, and he said I must get rid of the inflammation.”

Mrs. Dean believes that Serrapeptase is helping her with this and that her breathing has improved. Although she has always had an inhaler beside her bed at night, she now finds that even when she forgets to use it she doesn't notice any ill effects.

PULMONARY TUBERCULOSIS HEALTH PLAN

The plan to help your pulmonary tuberculosis includes: Resolving the immune problems and clearing the inflammation, scarring, and dead tissue. By adding important nutrients such as Vitamin D3, the recovery should be apparent within 30 days.

*Your 4-8 Week Plan, From My eBook, by Robert Redfern
Supplements to support healthy lungs - in order of priority:*

- **Serranol** - SerraEnzyme Serrapeptase, Curcuminx4000, Ecklonia Cava (Seanol) and Vitamin D3. Take 2 capsules x 3 times per day, 30 mins before eating a meal with water, and reduce to 1 x 3 after a good relief.
- **Nascent Iodine** – Iodine is essential for a completely healthy body. Take 5 drops x 3 times per day in 20ml of water, swish around the mouth for 30 seconds before swallowing. Build over 2 weeks to 15 x 3 until well and then slowly reduce back to 5 x 4. Take 1st dose on waking, 2nd midmorning and 3rd midafternoon. Note that Iodine needs a supplement containing Selenium to activate it, such as Active Life, D.I.P. Daily Immune Protection or B4 Health Spray.
- **Ancient Minerals Magnesium Oil Ultra** - Increases absorption of magnesium and reduces pain. Spray liberally onto skin such as chest, arms and leg muscles to cover a wide area for absorption.
- **D.I.P. Daily Immune Protection** - Take 1 capsule, twice daily with food. Protects against infection and maintains a balanced immune system.
- **OxySorb** - Promotes oxygen absorption. Take OxySorb formulation if you have breathing problems. Provides greater oxygen absorption and supports the entire respiratory system. Take around 20 drops in the mouth for at least 30 seconds and then swallow. Use as needed.
- **Prescript-Assist - 29 Super Strain Probiotic** - This is the next-generation, clinically-proven vegan probiotic supplement. Take 1 capsule x 2 times a day (can be opened and mixed with food) and then for maintenance at the rate of 1 every 3 days. **(See www.Probiotic29.com/studies.)**
- **Active Life Capsules** - Essential vitamins, folic acid, 77 trace minerals and elements, electrolytes, and 18 amino acids to help replenish storages in your body that are naturally depleted each day. Take 3 capsules, twice daily.

Other Recommended Products

- **1st Line (Thiocyanate) Immune Support Kit** - This clears any infection remaining in the cells. Take 1 kit daily for 3 days (total of 3). 1st Line should always be taken at least 90 minutes before and after food, approximately. 3 kits are the minimum, and in serious conditions, 10 kits over 10 days are better if finances allow.
- **Essential Digestive Plus** - For healthy digestion and nutrient absorption. Take 1 capsule as you start your meals, 3 times per day.
- **Naturally Better Vitamin E** - Protects healthy fats from oxidising and causing free radical damage. Take 1 capsule, 2 times daily.
- **The Krill Miracle** - Krill oil replaces missing essential nutrients. Take 1 capsule x 2 times per day, with food.

As A Vegetarian Alternative To Krill Oil...

- **Hemp Seed Oil** - Contains Omega 3, 6 and 9 fatty acids from cold-pressed organic hemp. It can boost the immune system and support a positive mental state. Take 1 teaspoon x 2 times per day.
