

Administering Tablets to Dogs and Small Animals

Giving Tablets to Dogs

1. Open the muzzle.
2. Place the tablet at the back of the throat.
3. Close the muzzle.
4. Keep it closed and stroke the throat until the dog swallows. That's how the vets do it.

Animal Treatment FAQ

Q: Had an ultrasound this week - Our dog has either a large lung abscess, cyst, or even cancer; he also has kidney inflammation. He's 90 lbs. I want to try Serrapeptase - how much can I give him? I need this to start working immediately.

A: This may seem a lot to do, but it is designed to completely restore your dog (or you) to good health. Follow the Health Plan as recommended.

"I put my 11-year-old lab mix on your 80,000 units of Serrapeptase twice a day back in February for arthritis in his front legs. It took a few weeks, but it has made a big difference; he no longer limps at the end of an active day, and no pain meds are required. Thank you for all the information."

.....

"Hi Robert, Just thought I'd share this happy customer's story with you... Just wanted to let you know the success we have had with our dog taking Serrapeptase. Approximately 9 weeks ago he was diagnosed with a sizeable blood clot that was affecting the blood supply to his rear legs, so much so that he went on to 3 legs as his left leg was very painful and eventually did not want to walk. The scan that we had confirmed the position and size of the clot and that he did not have a pulse in either leg. He was given about a week to live.

I started him on Serrapeptase double strength 3 times a day and each day he has slowly got better and better. About 1 month ago he went for his check up, and the vet informed me that his pulse had returned in his right leg and just two weeks later we returned to the vet to be told that he now has a pulse in both legs. He is now almost back to his old self and walking a full perimeter of our park and enjoys chasing his ball again which for us is fantastic news. All of this I am sure is down to the Serrapeptase that we have given him.... even the vet has said he is a walking miracle!"

"Dear Robert, please keep selling this product at this affordable price. I have checked other prices excluding delivery, and yours is the best. Hence, I am buying another one. I know SerraPet works as it dissolved my Labrador's oral cancerous tumor. I am now buying it for my GSD rescue dog for her cysts. Many thanks, seller, for being fair."

Follow the Health Plan as recommended for the best results:

DOG AND SMALL ANIMAL HEALTH PLAN

This small animal health plan is designed for dogs and other small animals. When the supplements are taken alongside the healthy animal foods plan, it's possible for recovery to happen faster and for dogs and other small animals to find better pain relief for their condition.

*Your 4-8 Week Animal Health Plan, From My eBook, by Robert Redfern
Supplements to support healthy pets - in order of priority:*

- [SerraPet](#) - Serrapeptase tablets 80,000IU. Give 2-4 per day to your pet/animal, depending on its size.
- [Curcuminx4000](#) - Give 2-4 capsules per day to your pet/animal, depending on its size. Open and mix with food.
- [Prescript-Assist - 29 Super Strain Probiotic](#) - This is the next-generation, clinically-proven vegan probiotic supplement. Give 1 capsule opened and mixed with food (double or triple in serious cases). ([See www.Probiotic29.com/studies](http://www.Probiotic29.com/studies))
- [Spatone](#) - Iron liquid supplement. 100% natural liquid iron supplement that has been scientifically shown to be a highly absorbable source of iron that is extra gentle on the stomach whilst helping to prevent iron deficiency.
- [B4Health Spray](#) - B Vitamin Complex spray - Take about 1/2 of the human dose.
- [Protease Enzymes](#) - Give 3 capsules daily. Break open and mix with a form of protein, e.g. honey or veggies on an empty stomach about 30 minutes before food.
- [Essential Digestive Plus](#) - Give 3 capsules daily, as protease enzymes can be mixed at the same time.
- [BetaFactor](#) - Contains Ultra BETA (Beta 1.3d Glucan) to support the immune system. Give 2 capsules daily. Break open and take just before food, mixed with honey or veggies.
- [Hemp Seed Oil](#) - Give 2 teaspoons daily, mixed with the food below.

Small Animal Food Plan

- **Raw foods** - 1/3 protein, 2/3 veggies – raw fish, raw chicken, raw eggs, raw vegetables (or steamed lightly to soften) – all foods minced or blended.
